SURGICAL WOUND CARE

1) Keep wound as dry as possible.
2) Keep bulky dressing in place for 24 hours after surgery.
3) Remove bulky dressing after 24 hours.
4) Do not remove steri-strips. Protect steri-strips from water with a Band-Aid or Telfa Pad. If steri-strips become wet, dry with a hair dryer.
5) Do not clean wound or apply antibiotic ointment to wound.

**Please note: Your provider may modify your surgical instructions per your visit.*
